DIRECTORY OF OFFICIALS AND ORGANIZATIONS CONCERNED WITH THE PROTECTION OF BIRDS AND GAME, 1914.¹

The fifteenth annual directory of officials and organizations concerned with the protection of birds and game in the United States and Canada has been arranged on the same plan as the directories issued each year since 1900, and has been revised to July 15, 1914.

The object of this directory is to present, in convenient form, the names of persons to whom application may be made for information respecting game laws. It also shows the date of establishment of each State commission or wardenship, the changes which occur in such offices, and the publications issued by game officials. As many of the present fish and game commissions originated as fish commissions, the year when each was established and that in which it assumed jurisdiction of game are given.

In 45 States and Territories the enforcement of game laws is intrusted to game commissioners, wardens, or other State officers; in Mississippi and Nevada to county wardens; in Virginia to city and magisterial district wardens; in Arkansas to sheriffs and similar local officers; and in the District of Columbia to the Metropolitan police. The first special game officials were the local officers appointed in Massachusetts in 1739 for the preservation of deer, and called deer reeves in 1764. Moose wardens were appointed in Maine in 1852, and ducking police in Maryland in 1872. The first State commissions whose jurisdiction was extended to include this work were the fish commissions of California and New Hampshire in 1878. Several national organizations are interested in the protection of birds and game, of which two are really international. In addition State associations and many local organizations cooperate in the work of protecting game in 31 States. One of these associations was organized in 1844, another in 1865, and a third in 1871. Similar organizations have been formed in 8 Provinces of Canada, of which 1 in Nova Scotia was established in 1853 and 1 in Quebec in 1859. Finally, 38 States have Audubon societies, organized especially for the study and protection of nongame birds.

Persons interested in game protection are requested to notify the Biological Survey of any errors or changes in addresses, in order that necessary corrections may be made in future editions of the directory.

T. S. PALMER,
Assistant Chief, Biological Survey.
